DETAILED ACTION

1. This office action is in response to the After-Final Amendment and Remarks filed 5 July 2006, in which claims 1, 3-16, and 18-30 were presented for examination.

Allowable Subject Matter

2. **Claims 1, 3-16, and 18-30** are allowed.
3. The following is an examiner's statement of reasons for allowance:

The prior art of record does not teach or fairly suggest the claimed method and system as a whole, comprising: specifying a search area along a route to a destination by dividing the route from a user position to the destination into distance ranges and defining a transversal distance from the route; retrieving POIs within the search area; displaying a list of distance ranges where each distance range shows a number of POIs retrieved within the distance range, wherein the step of displaying the list of distance ranges includes a step of illustrating a mark showing a current position of a user in a corresponding distance range; displaying a list of POI names in a distance range selected by a user in an order determined by modified distance of the POIs, wherein the modified distance is a combination of a drive length on the route from the user position to a reference point defined on the route and a straight-line length from the reference point to the POI.

The prior art of record teaches a navigation display method and system of determining a route from a user position to a destination, dividing the route into distance ranges and defining a transversal distance from the route, retrieving points of interest

within the search area, displaying a list of the points of interest within the distance range, displaying a list of points of interest names in a selected distance range in an order determined by a modified distance, wherein the modified distance is a combination of a drive length on the route and a straight-line length from the route to the point of interest. The prior art further teaches a display of a current position mark within a selected distance range. However, none of the prior art of record either singularly or in combination teaches the claimed method and system as a whole.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
